WORK EXPERIENCE

Underwater Welder - Military Operations

2020-2023

Naval Engineering Command

- Performed underwater welding for the construction and repair of naval vessels.
- Conducted thorough inspections of underwater military installations for compliance.
- Led training sessions for junior welders on military standards and safety practices.
- Collaborated with engineering teams to develop effective repair strategies.
- Maintained detailed records of all welding operations for audit purposes.
- Participated in mission planning and execution for underwater operations.

Underwater Welder

2019-2020

Defense Marine Services

- Executed welding and cutting operations for military vessels and equipment.
- Worked in high-pressure environments, ensuring compliance with safety regulations.
- Assisted in the development of training manuals for underwater welding procedures.
- Maintained and operated specialized welding equipment for military applications.
- Documented all operational activities and welding results for reporting.
- Participated in safety drills and emergency preparedness training.

ACHIEVEMENTS

- Recognized for exemplary service with a commendation from the Navy.
- Awarded 'Best Welder' during annual military evaluations in 2019.
- Successfully led a team that completed a critical repair project ahead of schedule.
