### EDUCATION

**MASTER OF PUBLIC HEALTH (MPH),  
UNIVERSITY OF PUBLIC HEALTH**

### ACHIEVEMENTS

- Co-authored a research paper on the impact of rabies vaccination programs in urban areas.
- Received 'Employee of the Year' award for outstanding contributions to public health initiatives.
- Developed a public awareness campaign that increased vaccination rates by 40% in local communities.

### PROFILE

Results-oriented Veterinary Epidemiologist with 5 years of experience in public health and animal epidemiology. My work focuses on the prevention and control of infectious diseases that affect both animals and humans. I have successfully coordinated multi-disciplinary teams in conducting case-control studies and outbreak investigations. My expertise includes analyzing epidemiological data and utilizing advanced statistical techniques to inform decision-making processes.

### EXPERIENCE

#### EPIDEMIOLOGIST

##### State Department of Health

*2016 - Present*

- Led investigations into zoonotic disease outbreaks, coordinating with local veterinary clinics.
- Analyzed case data to identify trends and provide recommendations for public health interventions.
- Prepared reports that informed state policy on animal health regulations.
- Conducted training sessions for health professionals on zoonotic disease recognition and management.
- Utilized statistical software to model disease spread scenarios, enhancing preparedness strategies.
- Collaborated with epidemiologists on multi-state outbreak investigations.

#### VETERINARY TECHNICIAN

##### Community Animal Hospital

*2014 - 2016*

- Assisted veterinarians in diagnosing and treating infectious diseases in domestic animals.
- Maintained accurate health records and monitored animal populations for signs of disease.
- Educated pet owners on preventive care and the importance of vaccinations.
- Participated in community outreach events to promote animal welfare and health.
- Implemented infection control protocols, reducing hospital-acquired infections by 20%.
- Trained new staff on best practices for animal care and client communication.
