- 📍 San Francisco, CA

### SKILLS

- Molecular diagnostics
- Epidemiology
- Research
- Teaching
- Mentoring
- Public health

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**PHD IN VETERINARY PARASITOLOGY,  
UNIVERSITY OF VETERINARY  
MEDICINE, 2008**

### ACHIEVEMENTS

- Recipient of the National Excellence in Research Award for outstanding contributions.
- Increased student engagement in parasitology courses by 50% through innovative teaching methods.
- Established a collaborative research network with international institutions.

Accomplished Veterinary Parasitologist with over 12 years of experience dedicated to advancing the field of parasitology through research and clinical practice. I have worked extensively in both laboratory and field environments, focusing on the diagnosis and management of parasitic diseases in both wildlife and domestic species. My research has led to significant breakthroughs in understanding host-parasite interactions, and I have a strong track record of publishing in high-impact journals.

### WORK EXPERIENCE

#### VETERINARY PARASITOLOGIST AND RESEARCHER

Institute for Wildlife Health

2020 - 2025

- Conducted groundbreaking research on parasitic diseases affecting wildlife populations.
- Developed molecular diagnostic tools for rapid identification of parasites.
- Published over 15 peer-reviewed articles in top-tier veterinary journals.
- Presented findings at national and international conferences.
- Mentored graduate students in research methodologies and data analysis.
- Collaborated with conservation organizations to enhance wildlife health.

#### ASSISTANT PROFESSOR OF PARASITOLOGY

Veterinary University

2015 - 2020

- Taught courses on veterinary parasitology and supervised student research projects.
- Conducted research on the epidemiology of zoonotic parasites.
- Developed and implemented curriculum for advanced parasitology courses.
- Organized workshops for veterinarians on emerging parasitic threats.
- Collaborated with public health officials to address zoonotic concerns.
- Advised students on career development in veterinary parasitology.
