WORK EXPERIENCE

Plant Operations Manager

2020-2023

Sustainable Waste Management Inc.

- Managed operations for a waste treatment facility serving a population of over 200,000.
- Developed and implemented a comprehensive safety program that reduced incidents by 40%.
- Led initiatives to improve recycling rates, achieving a 50% increase.
- Collaborated with local governments to enhance waste diversion strategies.
- Conducted regular performance evaluations and implemented feedback systems for staff.
- Utilized advanced data analytics to improve operational decision-making.

Waste Management Consultant

2019-2020

EcoStrategies Group

- Provided consulting services to municipalities on waste management practices and compliance.
- Conducted audits of waste facilities to identify areas for improvement.
- Developed training materials for staff on best practices in waste management.
- Engaged with community stakeholders to promote awareness and participation in waste reduction programs.
- Prepared detailed reports for clients outlining operational recommendations.
- Monitored industry trends to inform strategic planning and operational improvements.

ACHIEVEMENTS

- Led a project that won the 'Innovative Waste Management Award' for improving recycling rates.
- Achieved recognition for developing a community outreach program that increased public participation.
- Successfully implemented a new waste tracking system that improved operational transparency.
