EDUCATION

**BACHELOR OF SCIENCE IN ECOLOGY,
UNIVERSITY OF WISCONSIN-MADISON**

ACHIEVEMENTS

- Led a project that received the National Award for Excellence in Ecological Restoration.
- Published findings in peer-reviewed journals, contributing to the body of knowledge on watershed health.
- Successfully engaged over 1,500 community members in watershed conservation initiatives.

WORK EXPERIENCE

WATERSHED RESTORATION MANAGER

Nature Conservancy

2020 - 2025

- Directed watershed restoration initiatives, resulting in the rehabilitation of over 200 acres of degraded land.
- Utilized remote sensing and GIS technologies to monitor ecological changes and guide project implementation.
- Engaged with local communities to promote stewardship and sustainable land management practices.
- Developed partnerships with governmental and non-governmental organizations for resource sharing.
- Prepared funding proposals that secured over \$750,000 for restoration efforts.
- Presented project results at national conferences, enhancing the organization's visibility and impact.

ECOLOGIST

Wildlife Conservation Society

2015 - 2020

- Conducted ecological assessments to evaluate the health of watersheds and recommend management actions.
- Collaborated with scientists to design and implement research projects on watershed dynamics.
- Facilitated community workshops to educate stakeholders on best practices for watershed conservation.
- Analyzed data to assess the effectiveness of conservation strategies and report findings.
- Contributed to the development of educational resources for public outreach.
- Participated in conservation planning efforts at the regional level.
