EDUCATION

BACHELOR OF SCIENCE IN ENVIRONMENTAL STUDIES, UNIVERSITY OF FLORIDA

ACHIEVEMENTS

- Awarded the Environmental Leadership Award for excellence in watershed management.
- Implemented a community education program that increased local participation by 40%.
- Developed a watershed monitoring framework adopted by several municipalities.

PROFILE

Accomplished Watershed Management Specialist with extensive expertise in ecological restoration and water resource conservation. Adept at employing a systems approach to address complex watershed challenges while enhancing ecological integrity. Demonstrated skills in stakeholder collaboration, project design, and environmental assessment. Proven ability to lead large-scale initiatives that align with regulatory compliance and sustainability goals.

EXPERIENCE

WATERSHED PROGRAM MANAGER

River Restoration Group

2016 - Present

- Oversaw the implementation of watershed management programs across multiple regions.
- Developed strategic partnerships with local governments to enhance water conservation efforts.
- Utilized remote sensing technology to monitor watershed health and identify trends.
- Facilitated community-led initiatives to restore native habitats.
- Conducted risk assessments to inform flood management strategies.
- Managed a diverse team of scientists and volunteers for project execution.

ENVIRONMENTAL CONSULTANT

Sustainable Solutions LLC

2014 - 2016

- Provided expert advice on watershed management practices to municipal clients.
- Conducted environmental impact assessments for proposed development projects.
- Developed educational materials to promote watershed stewardship among stakeholders.
- Analyzed water quality data to inform regulatory compliance efforts.
- Participated in public outreach campaigns to raise awareness of watershed issues.
- Collaborated with interdisciplinary teams to develop integrated management plans.
