SKILLS

- Microservices
- Cloud Computing
- CI/CD
- Docker
- JMeter
- Agile

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER OF SCIENCE IN INFORMATION TECHNOLOGY, ADVANCED INSTITUTE OF TECHNOLOGY

ACHIEVEMENTS

- Achieved a 40% reduction in API response time through strategic refactoring.
- Recognized for exceptional problem-solving skills during critical project phases.
- Contributed to the team winning a prestigious technology innovation award.

PROFILE

Results-driven Web API Developer with over 8 years of experience specializing in microservices architecture and cloud-based solutions. Proficient in designing and implementing APIs that cater to both internal and external clients, ensuring high availability and performance. Skilled in integrating third-party services to enhance functionality and improve user experiences. I have a background in DevOps practices, which allows me to streamline deployment processes and improve collaboration between development and operations teams.

EXPERIENCE

LEAD API DEVELOPER

Cloud Services Co.

2016 - Present

- Architected and developed a suite of microservices that supported a multi-tenant SaaS application.
- Optimized API performance, achieving a 99.9% uptime over a year.
- Implemented CI/CD pipelines that reduced deployment times by 60%.
- Engaged with clients to gather requirements and provide tailored API solutions.
- Conducted performance testing using JMeter, identifying and resolving bottlenecks.
- Mentored a team of junior developers on best practices for API design and implementation.

WEB API DEVELOPER

Innovative Tech Solutions

2014 - 2016

- Developed and maintained RESTful APIs for a financial services platform.
- Implemented caching strategies that improved response times by 40%.
- Worked closely with UI/UX teams to ensure seamless integration of APIs into web applications.
- Utilized Docker for containerization, improving deployment consistency across environments.
- Created and maintained comprehensive API documentation for developers.
- Collaborated with QA teams to ensure APIs met performance and security standards.
