WORK EXPERIENCE

Junior Web Automation Engineer

2020-2023

Tech Startups Inc.

- Assisted in developing automated test scripts using Selenium and Java, contributing to testing processes.
- Collaborated with senior engineers to identify testing requirements and ensure quality standards.
- Executed manual tests and documented results for compliance and reporting purposes.
- Participated in team meetings to discuss project progress and testing strategies.
- Supported the integration of automated tests into the CI/CD pipeline, enhancing efficiency.
- Engaged in knowledge sharing sessions to improve team capabilities in automation testing.

QA Intern

2019-2020

Digital Solutions Group

- Assisted in the execution of test cases for web applications, ensuring functionality and performance.
- Documented testing processes and results for review by senior QA staff.
- Participated in training sessions on automation tools and testing strategies.
- Collaborated with developers to understand application functionalities and requirements.
- Supported the QA team in maintaining testing documentation and reports.
- Contributed to the identification of areas for improvement in testing practices.

ACHIEVEMENTS

- Successfully contributed to automation efforts that improved test coverage by 30%.
- Received positive feedback from supervisors for quick learning and adaptability in tasks.
- Participated in a project that streamlined testing processes for a key application.
