Enthusiastic Web Performance Engineer with over 3 years of experience focusing on improving the performance of mobile applications. My expertise lies in identifying bottlenecks and implementing solutions that enhance user experience on mobile platforms. I have a strong foundation in front-end technologies and a keen understanding of mobile user behaviors. I am committed to delivering high-quality applications that not only perform well but also engage users effectively.

WORK EXPERIENCE

Web Performance Engineer | Mobile Innovations LLC

Jan 2022 – Present

- Optimized mobile applications, achieving a 25% reduction in loading times through targeted performance enhancements.
- Conducted performance testing using tools like Appium and JMeter to identify and resolve issues.
- Collaborated with designers to implement responsive design practices that improved usability.
- Engaged in user testing sessions to gather feedback and refine application performance.
- Utilized analytics tools to track mobile performance metrics and user engagement.
- Participated in team workshops to share insights on mobile performance best practices.

Front-End Developer | Tech Start-Up

Jul 2019 – Dec 2021

- Developed mobile-friendly websites with a focus on performance and responsiveness.
- Implemented lazy loading techniques that improved site speed by 15%.
- Worked closely with the backend team to ensure seamless integration of performance enhancements.
- Engaged in code reviews to ensure adherence to performance standards.
- Utilized user feedback to inform performance improvement strategies.
- Contributed to technical documentation regarding performance optimization practices.
