

# MICHAEL ANDERSON

## WEB PLATFORM ENGINEER

### PROFILE

With over 5 years of experience as a Web Platform Engineer, I specialize in developing robust web applications tailored to client needs. My journey in web development began with a passion for building interactive websites, which evolved into a career focused on creating scalable and efficient platforms. I have a solid foundation in full-stack development, with proficiency in both front-end and back-end technologies.

### EXPERIENCE

#### WEB PLATFORM ENGINEER

##### NextGen Web Solutions

2016 - Present

- Designed and developed a multi-tier web application using Angular and Spring Boot.
- Enhanced application security by implementing OWASP best practices.
- Collaborated with product managers to align development with business objectives.
- Optimized database queries, reducing response times by 35%.
- Conducted user acceptance testing to ensure functionality and performance.
- Participated in code refactoring initiatives to improve code maintainability.

#### JUNIOR WEB DEVELOPER

##### Digital Creations

2014 - 2016

- Assisted in the development of client websites using WordPress and custom themes.
- Regularly updated content and conducted website maintenance tasks.
