SKILLS

- Cloud Security
- Vulnerability Assessment
- Incident Response
- Security Auditing
- CI/CD Integration
- Security Training

EDUCATION

BACHELOR OF SCIENCE IN CLOUD COMPUTING, TECH UNIVERSITY

LANGUAGE

- English
- Spanish
- German

ACHIEVEMENTS

- Played a key role in achieving SOC 2 compliance for cloud-based applications.
- Recognized for developing a comprehensive cloud security training program.
- Successfully led a project that improved overall cloud application security posture.

Michael Anderson

CLOUD SECURITY ENGINEER

Innovative Web Security Engineer with over 7 years of experience in the technology sector, focusing on cloud-based applications and services. I have a deep understanding of securing web applications deployed in cloud environments, ensuring that security measures are in place to protect sensitive data. My expertise includes conducting thorough security assessments, developing security architectures, and implementing best practices for cloud security.

EXPERIENCE

CLOUD SECURITY ENGINEER

CloudTech Innovations

2016 - Present

- Designed and implemented secure cloud architectures for web applications, reducing security incidents by 30%.
- Conducted security audits for cloud deployments, ensuring compliance with industry regulations.
- Developed automated security testing tools that integrated into CI/CD pipelines.
- Collaborated with DevOps teams to incorporate security best practices throughout the development lifecycle.
- Managed incident response for cloud-based applications, effectively mitigating threats.
- Provided training to staff on cloud security principles and best practices.

WEB APPLICATION SECURITY SPECIALIST

TechGuard Systems

2014 - 2016

- Conducted vulnerability assessments for web applications hosted in cloud environments.
- Collaborated with development teams to ensure secure coding practices were followed.
- Assisted in the implementation of identity and access management solutions.
- Monitored cloud applications for threats using security information and event management (SIEM) tools.
- Documented security incidents and contributed to post-incident reviews.
- Engaged in industry conferences to stay current with cloud security trends.
