-  San Francisco, CA

SKILLS

- Metal fabrication
- Quality assurance
- Safety management
- Team coordination
- Process optimization
- Technical training

LANGUAGES

- English
- Spanish
- French

EDUCATION

ASSOCIATE DEGREE IN WELDING TECHNOLOGY

ACHIEVEMENTS

- Awarded 'Best Team Leader' for outstanding performance in 2021.
- Led a project that enhanced production efficiency by 25% through process improvements.
- Implemented a safety program that resulted in a 50% reduction in workplace accidents.

PROFILE

Accomplished welding foreman with a strong foundation in metal fabrication and a passion for quality assurance. Expertise in overseeing welding operations within fast-paced manufacturing environments, ensuring that all outputs meet rigorous industry standards. Known for cultivating a culture of safety and excellence, with a proven track record in enhancing productivity through effective team management.

EXPERIENCE

WELDING FOREMAN

LMN Manufacturing

2016 - Present

- Directed a team of 20 welders, ensuring adherence to safety regulations and quality standards.
- Implemented advanced welding techniques, resulting in improved weld integrity and reduced rework.
- Facilitated daily briefings to review project milestones and address potential challenges.
- Coordinated with supply chain management to optimize material procurement for welding projects.
- Developed and enforced standard operating procedures for welding processes.
- Utilized welding simulation software to train staff, enhancing technical skills and efficiency.

WELDING TECHNICIAN

PQR Industries

2014 - 2016

- Executed various welding operations, including MIG, TIG, and stick welding on diverse materials.
- Conducted quality inspections on finished products, ensuring compliance with customer specifications.
- Maintained welding equipment and tools, ensuring optimal performance and safety.
- Assisted in training new hires on welding techniques and safety practices.
- Collaborated with engineers to develop innovative fabrication solutions.
- Achieved a 30% reduction in welding defects through rigorous quality control measures.
