## ANDERSON

### SENIOR WELDING QUALITY INSPECTOR

Results-driven Welding Quality Inspector specializing in the automotive sector, with a strong focus on quality assurance and continuous improvement. Brings extensive experience in inspecting welds for automotive components, ensuring adherence to industry standards and customer specifications. Proficient in employing various inspection techniques, including destructive and non-destructive testing. Recognized for exceptional attention to detail and a proactive approach to problem-solving.

#### SKILLS

- Automotive Manufacturing
- Quality Assurance
- NDT Techniques
- Process Improvement
- Team Leadership
- Compliance Management

#### LANGUAGES

- English
- Spanish
- French

#### EDUCATION

**BACHELOR OF ENGINEERING IN  
MECHANICAL ENGINEERING,  
AUTOMOTIVE UNIVERSITY**

#### ACHIEVEMENTS

- Instrumental in reducing defect rates by 18% through process optimization.
- Received commendation for excellence in quality control in 2020.
- Successfully led a project that enhanced welding efficiency, resulting in significant cost savings.

#### WORK EXPERIENCE

##### SENIOR WELDING QUALITY INSPECTOR

AutoTech Manufacturing

2020 - 2025

- Led inspections of welds on critical automotive components, ensuring compliance with ISO standards.
- Utilized advanced NDT equipment to assess weld integrity and quality.
- Conducted training sessions for production staff on quality control procedures.
- Collaborated with cross-functional teams to implement corrective actions for quality issues.
- Monitored quality metrics and prepared reports for management review.
- Participated in continuous improvement initiatives to enhance manufacturing processes.

##### WELDING INSPECTOR

CarTech Industries

2015 - 2020

- Performed inspections of welds for automotive frames and structures.
- Utilized destructive testing methods to evaluate weld strength and performance.
- Maintained detailed records of inspection findings for quality assurance documentation.
- Assisted in the development of welding process specifications and standards.
- Coordinated with engineering teams to address quality concerns.
- Ensured compliance with safety regulations during inspection activities.
