EDUCATION

DOCTOR OF PHILOSOPHY IN WILDLIFE CONSERVATION, UNIVERSITY OF OXFORD

ACHIEVEMENTS

- Successfully contributed to the recovery of endangered large mammals, increasing populations by 30% over five years.
- Recognized for excellence in wildlife research with the Global Conservation Leader Award.
- Published influential articles in major conservation journals, impacting global wildlife policy.

WORK EXPERIENCE

LARGE MAMMAL BIOLOGIST
World Wildlife Fund
2020 - 2025

- Conducted population surveys of large mammals in protected areas to assess conservation status.
- Collaborated with international teams on transboundary conservation projects.
- Implemented tracking programs using GPS collars to study animal movement patterns.
- Presented findings to stakeholders to inform conservation strategies.
- Engaged with local communities to promote sustainable land-use practices.
- Authored research papers that contributed to global conservation knowledge.

WILDLIFE CONSULTANT
Environmental Defense Fund
2015 - 2020

- Provided expert advice on wildlife conservation strategies for various projects.
- Conducted environmental impact assessments to evaluate potential threats to wildlife.
- Facilitated workshops to educate stakeholders on best practices for wildlife conservation.
- Collaborated with researchers on innovative approaches to habitat restoration.
- Developed conservation plans that were adopted by local governments.
- Monitored and evaluated the success of implemented conservation initiatives.
