# Michael Anderson

## WORK MEASUREMENT ENGINEER

Experienced Work Measurement Engineer with 7 years of expertise in the healthcare industry, focusing on optimizing hospital operations and improving patient flow through effective work measurement techniques. My proficiency in time studies and workflow analysis has enabled me to identify inefficiencies and implement solutions that enhance both staff productivity and patient satisfaction.

## EXPERIENCE

### WORK MEASUREMENT ENGINEER

HealthFirst Hospital

2016 - Present

- Conducted time and motion studies to analyze patient flow and optimize staff schedules.
- Collaborated with nursing and administrative teams to identify areas for operational improvement.
- Implemented work measurement systems that improved patient throughput by 15%.
- Utilized data analysis tools to monitor and report on key performance metrics.
- Trained staff on Lean principles to foster a culture of continuous improvement.
- Presented findings to hospital leadership, influencing policy changes that enhanced patient care.

### OPERATIONS ANALYST

CareWell Clinics

2014 - 2016

- Analyzed workflow processes to identify inefficiencies in patient handling.
- Assisted in the development of training materials based on work measurement findings.
- Collaborated with IT teams to implement new scheduling software that improved efficiency.
- Provided recommendations for optimizing resource allocation in clinical settings.
- Participated in cross-departmental meetings to align operational strategies with organizational goals.
- Supported management in preparing reports for regulatory compliance audits.
