Michael Anderson

WOUND CARE NURSE

Skilled Wound Care Nurse with 6 years of clinical experience in acute care settings, focusing on the treatment of complex wounds and promoting patient safety. My career has been distinguished by my dedication to continuous learning and implementing the latest wound care practices. I have developed strong assessment skills that enable me to identify wound types accurately and select appropriate interventions.

EXPERIENCE

WOUND CARE NURSE

Metro Health Center

2016 - Present

- Provided direct wound care treatment to patients in the surgical and critical care units.
- Conducted thorough assessments and documented wound characteristics and treatment responses.
- Collaborated with physicians to devise comprehensive care plans tailored to individual patient needs.
- Educated patients and families about wound care and prevention strategies.
- Participated in quality improvement projects aimed at enhancing patient care protocols.
- Maintained compliance with infection control measures to ensure patient safety.

REGISTERED NURSE

City General Hospital

2014 - 2016

- Assisted in the care of patients post-surgery, with a focus on wound assessment and management.
- Monitored vital signs and reported any changes to the healthcare team promptly.
- Implemented care plans designed by physician teams, ensuring adherence to treatment protocols.
- Documented patients' progress and treatment efficacy in electronic health records.
- Educated patients about their care plans and the importance of follow-up visits.
- Engaged in team discussions to improve wound care practices and patient education initiatives.
